

MSc Advanced Clinical Practice

This innovative, flexible, student-centred programme aims to enable nurses, midwives and other healthcare professionals to build on their expertise to become leaders within their chosen field. It will support you in your ongoing development as a knowledgeable and skilful practitioner in your specific specialist area. On successful completion of this programme you should be able to assume a leading role in the provision of high quality evidence-based health and social care underpinned by a robust and scientific knowledge base.

There is a choice of three pathways in this programme:

- Standard Pathway
- Cancer Care Pathway
- Neonatal Studies Pathway

A fourth pathway in Child and Adolescent Mental Health is pending validation.

Cancer care pathway

The introduction of the MSc Advanced Clinical Practice (Cancer Care) has been designed to fulfil both national and local criteria for the preparation, education and training of senior cancer registered practitioners to Masters level. It provides the theoretical underpinnings for advanced cancer care practice within a framework which is relevant, flexible and responsive to the multivariate needs of cancer specialists drawn from a variety of disciplines and clinical settings.
